

1. Run the Installer file

- *Once the download completes, locate the downloaded **.exe** file (usually in your Downloads folder).*
- *Double-click the **.exe** file to start the installation process.*

2. Follow the Installation Wizard

- *A setup wizard powered by NSIS will appear.*
- *Click **Next** to proceed through each step.*
- *Choose your preferred installation directory or go with the default.*
- *Click **Install**.*

3. Finish Installation

- *After installation, click **Finish** to close the wizard.*
- *The software is now installed on your system.*

4. Launch the Software

- *You can now find the software in your Start Menu or desktop (if you chose to create a shortcut).*
- *Double-click to launch and start using it.*
