

## 1. Unzip the Downloaded File

- a. Once the download completes, locate the `.zip` file (usually in your Downloads folder).
- b. Double-click the `.zip` file to extract it.

## 2. Locate the Application

- a. After extraction, a new folder or application file will appear.
- b. Inside, you'll find the ready-to-use application (`.app` file).

## 3. Open and Use the Application

- a. Double-click the `.app` file to open the software.
- b. You may get a security prompt the first time; click "Open" if prompted.

## 4. Optional: Move to Applications Folder

- a. For easier access, you can drag the app into your desktop folder.
